A quilted Advent Calendar measuring 34 inches square. There are 25 paper pieced 4" squares that are separate and are to be inserted in the quilted foundation ... one for each day in December leading up to Christmas. I have stencilled the dates in gold on the foundation in a pattern so that as each piece is inserted there is a little more interest in the pattern as it is being filled in ... with Santa being the centre square on the 25th. There are actually 30 pieces to the pattern (I'm guessing in case of loss) and I have made a drawstring bag to hold all the pieces.

3D Christmas Tree using 2 ½" pieces of batting and Christmas cotton prints. It measures about 10" tall and each of the 3 sides is 8" across the base. I basted mini pearls around the tree for interest.

Polymer clay figurine made recently. I added a photo of the unfinished sculpture on my hand so people can see the size of it.
